Course Description

This course deals with the work of planning commissions in the subdivision and land development review process. With the Pennsylvania Municipal Planning Code (MPC) as the source of authority to regulate development, this course covers flexible design concepts and options for better project design. Participants can learn new skills for administering the review process, reviewing plans, and calculating impacts of development - as well as techniques for incorporating internal and external reviews in plan review, and how information sharing can improve local and regional planning.

Course Fee \$160

(\$115 for PMPEI instruction and course materials and \$45 for sponsor costs)
