

2025 | Chester County

Transportation Improvement Inventory

Chester County

Transportation Improvement Inventory 2025

Overview:

The Transportation Improvement Inventory (TII) is a comprehensive record of documented transportation needs within Chester County. It includes proposed roadway, bridge, bicycle and pedestrian, freight and transit projects that have been recommended to the Chester County Planning Commission by municipalities and other stakeholders over time. Although the TII listing does not represent programming or funding commitments, it recognizes transportation priorities and emphasizes the need for additional technical and financial resources to implement critical transportation improvements.

Why Inventory the County's Transportation Needs?

- To provide a single source of transportation needs and proposed transportation projects in Chester County
- To facilitate efficient coordination between municipalities, Chester County, PennDOT, SEPTA, DVRPC and other agencies
- To identify potential opportunities for technical and financial resources for implementation
- To coordinate transportation improvements during the land development approval process among municipalities, PennDOT, and Chester County.

Highlights of 2025 Transportation Improvement Inventory:

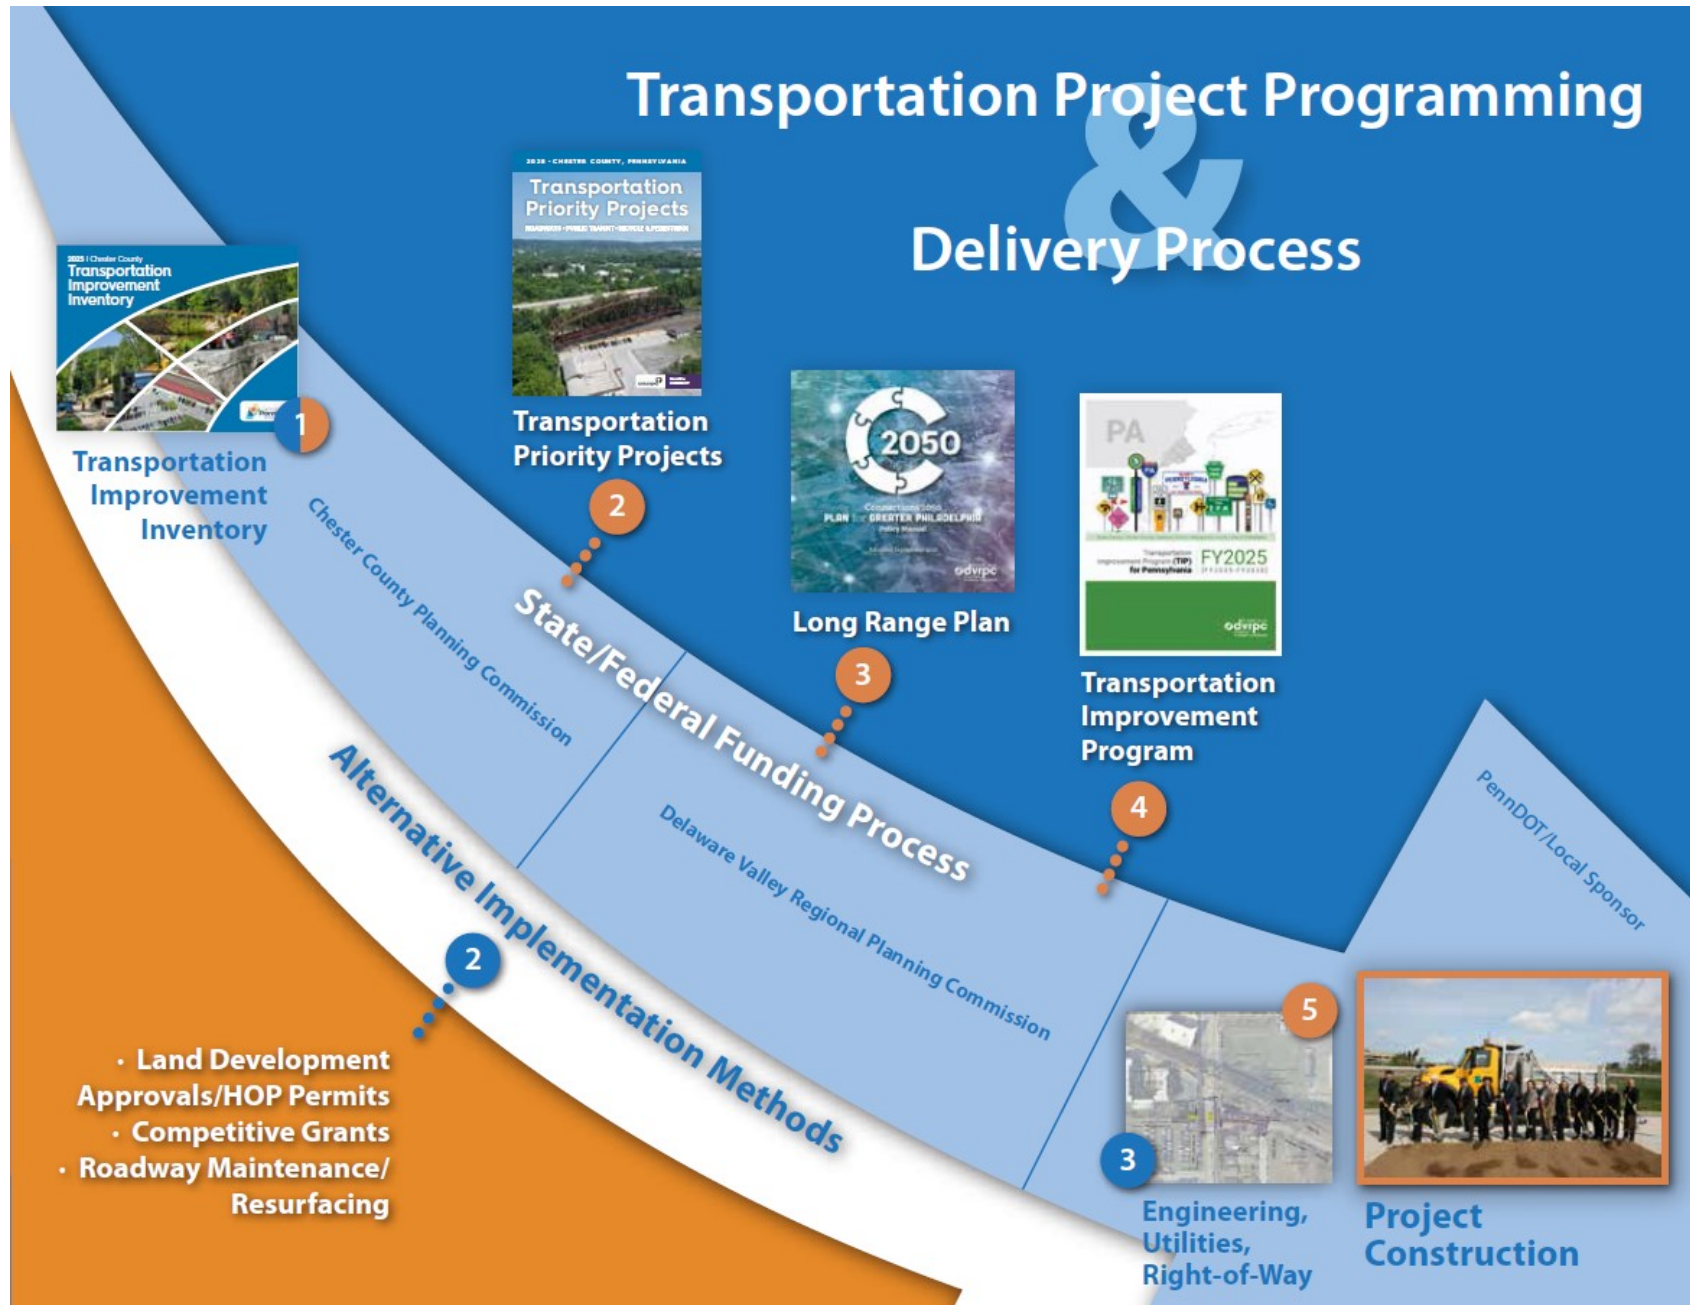

The 2025 TII Contains 561 Projects with a total estimated cost of over \$4.59 billion

Since 2023, 55 projects were added, and 21 projects were completed or retired

- The County-wide interactive map provides general locations of TII projects along with project specific information
